PROBLEM STATEMENT :

The expense tracker is an android app which runs on all android platforms. It helps user to manage all their expenses in an efficient way and track budget. This would avoid budget handling difficulties and gives us efficient results on our savings. In everyone's life, money plays an important role. A person who cannot manage his expenses cannot successfully lead a household and fulfill his goals. In the current world where mobile phones and laptops have become a part of living, such an app would be handy to deal with all our expenses. A person generally cannot keep track of all his expenses through the traditional pen and paper method and might miss a few of his small expenditures and may even miss some bills. Such a situation will never arise when we use an app. We can make easy comparisons by seeing the graphs, which is impossible in the rigorous methods.
